New Roses for 1936

An advance list of the Bobbink & Atkins novel and new Roses is being sent you so that you can make your selections before supplies become short. The descriptions and prices are just as they will appear in the complete catalogue, which will not be mailed for several weeks.

Every plant delivered will be of the highest quality - 2 years old and fieldgrown, and pruned ready for planting.

To save you any trouble, use this list as an order sheet. Mark before each variety the number of plants you want. Fill in the last page and return the list with your remittance. The plants will be sent at the proper planting time, or when you desire.

For a complete list of Roses, turn to the 1936 catalogue.

Very truly yours,

LCB:OP

BOBBINK & ATKINS.

ADVANCE LIST

1936 NOVELTY and NEW ROSES

by Bobbink & Atkins
Rutherford, N.J.

Gathered in this section are the finest new Roses produced by famous American and European hybridizers. Grow them in your garden and enjoy the latest creations, in rare colors and fragrance. Descriptions of patented Roses are the introducers'.

ALEZANE. HT. (Pahissa, 1934.) Plant Patent No. 116. Bud urn-shaped large reddish brown; flowers cupped opening to rich apricot, and reverse of petals sorrel striped with yellow veins. Growth vigorous. An interesting and striking novelty. \$1.50 each.

AMELIA EARHART. HT. (L.Reymond, 1929.) Plant Patent No. 63. Giant yellow bloom with a golden yellow center, paling at the edges to a light canary shade. Very fragrant. A free and continuous bloomer all season. One of the largest Roses, and of exceedingly handsome form. \$1.50 each.

BARCELONA. HT. (W.Kordes Sons, 1932.) Somewhat like Sensation in general appearance, this beautiful dark crimson Rose has 75 or more petals arranged in a symmetrical, cupped form with a rich old-rose fragrance. The color does not burn in strong sunlight and the blooms last in good condition for several days. Plant vigorous and upright, blooming freely throughout the season. \$1.25 each.

BETTER TIMES. HT. (Jos.H.Hill Co., 1934.) Plant Patent No. 23. An outstanding new Rose with long crimson buds opening into large, double, brilliant cerise-red flowers. \$1.50 each.

CARILLON. HT. (J.H.Nicolás.) Plant Patent No. 136. A bedding rose of great activity, giving at all times a note of cheer in the garden. The long pointed buds are orange-scarlet, contrasting pleasingly with the green sepals. The half-open bloom is a deep coral overcast with orange and the full bloom is large. \$1.50 each.

CARMELITA. HT. (F.Spanbauer, 1933.) Plant Patent No. 91. Large ovoid bud of E. G. Hill color; flowers vivid red, color same on both sides of petals without variations. A vigorous grower with abundant large leathery, dark green foliage. \$1.50 each.

CARRIE JACOBS BOND. HT. (Howard & Smith, 1935.) Large, intensely fragrant flowers of rose-pink, flushed crimson at center produced on long stems. Plants are profuse and continuous bloomers. An exhibition Rose. Plant habit stiff and upright. \$1.50 each.

CLAIRE DESMET. HT. (E.M.Buatois, 1932.) Medium-sized, cupped flowers of clear golden yellow, with a richer tone at the base of the petals. The well-shaped sweetly fragrant blooms have about 40 petals and are generally borne singly on strong stems. Plants bushy and bloom freely. \$1.25 each.

- COLONEL SHARMAN CRAI FORD. HT. (A. Dickson & Sons, 1933.) Large, very lasting, intensely fragrant flowers of rich velvety crimson borne on long, strong stems. Plants bushy and bloom freely. \$1.25 ea.
- CONDESA DE SASTAGO. HT. (P. Dot, 1933.) A brilliantly colored rose-oriental red inside the petals, golden-yellow on the reverse. The blooms are large, semi-double, cup-shaped and fragrant and are borne several together on a strong, short stem. Foliage abundant, large, glossy dark green. Growth very vigorous, upright, free bloomer all season. Unusually hardy. \$1.25 ea.
- COUNTESE VANDAL. HT. (M. Leenders & Co., 1932.) Plant Patent No. 38. Exquisitely formed flowers, bronzy in the bud, opening to pointed, bright flesh-pink blooms with flame tones on the backs of the petals. Plants vigorous and free blooming. \$1.00 ea.
- CRIMSON GLORY. HT. (W. Kordes Sohne, 1935.) Plant Patent No. 105. A valuable new fragrant rose that already has won wide popularity. The large urn-shaped buds open to deep velvety crimson. Foliage abundant, leathery. Plants very vigorous, hardy, bushy and spreading. A profuse and continuous bloomer. \$1.25 ea.
- CYNTHIA. HT. (Vorschuren-Pechtold, 1933.) A sturdy rose welcomed by rosarians as an improved Chas. P. Kilham. The attractive buds, good for cutting, open to splendid double blooms of a glowing rich oriental-red color. Its free flowering habit and attractive color make it very desirable. \$1.00 ea.
- DUQUESA DE PENARINDI. HT. (P. Dot, 1931.) Coppery apricot, the June color of this rose intensifies to rich cinnamon-peach in early autumn. 50 petals. A rose of rare colors; vigorous upright grower; Pernetian hybrid. A Gold Medal Rose. \$1.25 ea.
- EMPERESS. HT. (Chaplin Bros., 1933.) A colorful medium-sized Rose of excellent form, with 25 broad petals of bright pink tinged with salmon. Notable for extraordinarily strong, rich fragrance for which it won the coveted Clay Cup in London. Stems are stiff and erect, and foliage large and dark. Promises to be excellent bedding rose. \$1.25 ea.
- FEU PERNET-DUCHER. HT. (C. Mallerin; 1934.) Plant Patent No. 105. Fine form, rich coloring and fragrance distinguish this yellow rose from all others. Creamy buds open rich yellow, gold in the center, with occasional pink flushes or white markings on outside petals. Double, tall, bushy plants; free flowering. Named in honor of M. Pernet-Ducher famous originator of Pernetiana strain of roses. \$1.50 ea.
- GIPSY LASS. HT. (Alex. Dickson & Sons, 1932.) A splendid novelty among the crimson Roses with exquisitely shaped, rich scarlet-crimson flowers with maroon shading. A strong, vigorous grower. Splendid for cutting purposes. \$1.00 ea.
- CLOUING. HT. (J. H. Nicolas, 1935.) Plant Patent No. 157. The large buds are carried on long rigid stems amply clothed with handsome foliage. The plant is vigorous and branching. The color is a soft satiny pink heavily laden with salmon and amber. \$1.50 ea.

- GLOWING SUNSET. HT. (Wilhelm Kordes, 1934.) U.S. Plant Patent No. 104. Blooms are an odd combination of orange-yellow and rose pink, a unique but pleasing color effect. Buds are long, pointed; open flowers have center of curled petals. Fragrant. A free and continuous bloomer. Color sometimes variable. \$1.50 ea.
- HINRICH GAEDE. HT. (W. Kordes Sons, 1931.) A fine long-pointed bud of nasturtium-red, opening into a large, double, orange-yellow bloom with nasturtium-yellow glow. Flower is produced on a long, strong stem. Plants are vigorous and free flowering. \$1.50 ea.
- LADY SACKVILLE. HT. (B. R. Cant & Sons, 1933.) A very large flower of pure white borne on a long, strong stem. \$1.25 ea.
- LADY VIOLET ASTOR. HT. (B. R. Cant & Sons, 1933.) Flower very large and exceptionally lasting of deep rose-pink. Excellent garden variety of first class quality. Free-blooming. \$1.25 ea.
- LAL. HT. (W. Easlea & Sons, 1933.) Fine, bold flower with 20 or more long, deep petals. It is a bright pink of about the same shade as Mrs. Henry Morse, with a rich yellow suffusion extending upward from the base of the petals. Especially recommended for its exquisite perfume. Splendid for cutting. \$1.25 ea.
- LEONARD BARRON. HT. HT.-Nutmans. (J. H. Nicolas, 1931.) The blooms are very large and full double to the center with nearly 100 petals. The colors are softly blended, light salmon and shell-pink being suffused with pale copper. The form is unusually good for so large and heavy a rose. Makes a fine showing on the plant; before cutting allow the bloom to open on the plant. Foliage strong and healthy, plants robust, spreading in habit. Awarded many prizes. Named for the horticultural editor of "American Home" magazine. \$1.00 ea.
- LESLEY DUDLEY. HT. (S. McGredy & Son, 1932.) A perfectly formed flower of 35 petals, rose-pink throughout with an orange-scarlet sheen. At times the outside of the petals is suffused with soft, pinkish buff and gold. Fragrance strong and sweet. \$1.25 ea.
- LITTLE BEAUTY. HT. (Howard & Smith, 1935.) Plant Patent pending. Small, very double flowers of bright cerise-pink, fading to pleasing pink. Foliage leathery. Vigorous (3 ft.) upright, bushy profuse, continuous bloomer. \$1.00 ea.
- LUDWIG OPPENHEIMER. HT. (Leender Bros., 1932.) Fine, full flowers with 50 or more petals arranged in an elegant pointed form. Deep glowing crimson-scarlet with a velvety sheen; strong, delightful perfume. Plants grow vigorously and upright, with few thorns and brilliant green, disease-resistant foliage. \$1.25 ea.
- LYDIA. HT. (H. A. Verschuren & Sons, 1932.) Orange-rose is the color of the variety although in effect it is a fine tone of pink. Buds long and pointed; blooms large, full, high centered and perfectly shaped and moderately fragrant. Plants vigorous and free-flowering. \$1.00 ea.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry, no matter how small, should be recorded to ensure the integrity of the financial statements. This includes not only sales and purchases but also expenses and income.

In the second section, the author details the various methods used to collect and analyze data. This involves a combination of direct observation, interviews, and the use of specialized software tools. The goal is to gather comprehensive information that can be used to identify trends and make informed decisions.

The third section focuses on the challenges faced during the data collection process. One major challenge is ensuring the accuracy and reliability of the data. This requires careful attention to detail and a thorough understanding of the underlying processes. Another challenge is the volume of data generated, which can be overwhelming and difficult to manage.

Finally, the document concludes with a discussion on the future of data analysis. It highlights the growing importance of big data and the need for advanced analytical techniques. The author suggests that continued investment in research and development is essential to stay ahead in this rapidly evolving field.

MALAR ROS. HT. (W.Kordes & Sons, 1932.) The intense old-rose fragrance of this variety is remarkable. The rich crimson of the large, double blooms deepens in autumn. The buds are pointed, oval-shaped and the blooms deep and well-formed. Good for cutting or bedding.
\$1.00 ea.

MATADOR. HT. (Van Rossem, 1935.) Patent applied for. When shown in European shows, it was hailed as a great red rose. Large full rose, well formed, scarlet crimson with darker silky sheen on the reverse, very perfumed, vigorous, healthy plant.
\$1.50 ea.

McGREDY'S YELLOW. HT. (S.McGredy & Son, 1933.) A very lovely, unfading canary-yellow flower of excellent, cupped form with 25 petals. The gold anthers make a striking contrast in the center. Vigorous and free flowering; the dark glossy foliage is like holly.
Gold Medal, N.R.S.
\$2.00 ea.

MEVROUW WELMEOT VAN HEEK. HT. (G.A.H.Buisman & Son, 1933.) A remarkably strong growing plant with majestic, carmine-red flowers of approximately 50 petals, well arranged and unfading. One of the strongest and freest flowering varieties on our fields. Because of color, growth, and blooming qualities it seems to be an exceptionally good Rose for any purpose. While the name is long and almost unpronounceable, the Rose itself is outstanding and was awarded the Gold Medal in Saverne.
\$1.50 ea.

MME. JOSEPH PERRAUD. HT. (Gaujard, 1934.) The rich nasturtium-orange color of this rose in bud is novel and captivating. The long slender, pointed buds open to fragrant blooms colored nasturtium-buff flushed with shell-pink at the petal edges. Bagatelle Gold Medal winner, 1934.
\$3.00 ea.

MRS. HENRI DAENDELS. HT. (G.A.H.Buisman & Son, 1931.) A delightfully shaped bud of deep buff tinted with cream, opening into a well shaped apricot-colored flower of about 30 petals. In form and size it resembles the famous Rev. F. Page-Roberts, but the color is a trifle lighter. Plants are very vigorous and free flowering.
\$1.50 ea.

MRS. PAUL GOUDIE. HT. (S.McGredy & Son, 1932.) A striking, well-formed, fragrant flower of a peculiar shade of yellow, edged and veined with rose-pink and crimson. It resembles a greatly improved form of the older Lord Lambourne, bearing its flowers on stout, upright stems well clothed with glossy green foliage.
\$1.50 ea.

MRS. T. B. DOXFORD. HT. (A.Dickson & Son, 1932.) A charming new Rose, somewhat like Mrs. Henry Morse, with very large, fragrant, pale pink flowers of 20 petals, with a soft yellow center. The outside of the petals is stained with strawberry-pink. Plants seem to grow very well and bloom freely throughout the season.
\$1.50 ea.

NANCY. HT. (C.Mallerin, 1934.) A charming, large, golden yellow flower with a warm chamois-yellow undertone, particularly handsome in the bud, opening to a wide-spread flower of 15 petals. Very free flowering.
\$1.50 ea.

- NIGRETTE. HT. (Max Krause, 1934.) Plant Patent No. 87. "The Black Rose of Sangerhausen." An odd rose of particular interest for its blackish-maroon, fragrant blooms. The color is deepest in the bud and varies with season and climate, the color usually being very dark in early autumn. Blooms small; plants dwarf with wiry stems. Free flowering. \$2.00 ea.
- OSWALD SIEPER. HT. (Max Krause, 1932.) Beautiful white with sulphur yellow center, possessing ideal form, stiff large petals, large full flowers, carried on strong erect stems. Strong bushy growth and disease-resisting foliage. A very fine new Rose. \$1.00 ea.
- PICTURE. HT. (S. McGredy & Son, 1932.) Clear velvety rose-pink. The buds are of medium size and well formed; the petals pleasingly reflexed. Growth is sturdy and free. An ideal Rose for garden or bedding purposes and splendid for cutting. \$1.00 ea.
- PINK DAWN. HT. (Howard & Smith, 1935.) A fine, deep-rose-pink flower opening to lively pink with an orange base. Fragrance sweet. \$1.00 ea.
- POLAR BEAR. New type, very hardy hybrid of Rugosa, Nutkana and Polyantha. Large white flowers with a faint blush; continuous bloomer. \$1.25 ea.
- PRESIDENT MARCIA. HT. (M. Leenders & Co., 1933.) A very strong-growing healthy plant of erect, branching habit, bearing clusters of semi-double, pale rosepink flowers with about 20 petals. A handsome bedding variety noted for its free blooming. \$1.25 ea.
- SOUTHPORT. HT. (S. McGredy & Son, 1933.) A brilliant, unshaded, scarlet Rose with about 18 deep petals and fine Tea scent. Particularly brilliant in bright sunshine and recommended for spectacular bedding effects. \$1.25 ea.
- SOUV. D'EMMANUEL BUATOIS. HT. (E.M. Buatois, 1932.) A very heavy solid flower with 65 or more petals arranged in a compact, statelike form. Color is a soft tone of creamy pink with golden shades verging on salmon. It is extraordinarily free blooming for such a large flower, and the plants are strong and vigorous. \$1.25 ea.
- SOUV. DE MADAME C. CHAMBARD. HT. (C. Chambard, 1931.) The large, long-pointed coral buds unfold to coral-pink blooms tinted peach. One to several blooms come on a long strong stem. Delightful fragrance. A very prolific and valuable rose. Foliage has average disease resistance. Plants strong, upright, unusually hardy. \$1.25 ea.
- SUSAN LOUISE. HT. (C.E. Adams, 1929.) A lovely light pink bush rose that is a seedling of Belle of Portugal. The flowers are produced continuously throughout the summer. \$1.50 ea.

TEXAS CENTENIAL. HT. (Dixie Rose Nursery, 1935.) Plant Patent pending. This bright vermilion-red Rose has a light tone of gold at the base of petals, with a lighter red at center of the bloom. It gradually tones to a deep, rich pink as the bloom ages. Bud is long-pointed, opening to a large moderately fragrant flower on a long, strong stem. \$1.00 ea.

VICTORIA HARRINGTON. HT. (Thomas, 1931.) A very large, rose with deep red buds opening to a double bloom colored dark red that does not fade, shaded with orange-brown and lighter in the center. The fragrance is rich and spicy. One or more blooms are borne on long stems. The plants are robust and the foliage good. Some consider this rose Captain Thomas' best origination. \$1.50 ea.

WHITE BRIARCLIFF (Mme. Louis Lens.) Patent No. 108. (Louis Lens, 1932.) Well-shaped, pointed, pure white flowers of 40 petals, with a delicious apple-green tint in their depths. Plants are abundant and continuous bloomers. Promises to be a fine new white variety for bedding and cutting. \$1.50 ea.

CLIMBING ROSES

New and Recent Introductions.

BLAZE. Plant Patent No, 10. A popular, intensely brilliant fiery scarlet Rose, with flowers in large clusters. Blooms intermittantly until well established. \$1.25 ea.

CLIMBING DAINY BESS. (J.H. Van Barneveld, 1935.) Because the bush form of this rose already has such a wide acceptance, the climbing form will be equally famous as soon as it is known. In flowering habit it is like the parent, with clusters of large, single blooms coming on strong, stiff stems. The broad petals are notched and fluted, and are colored soft flesh-pink. The center of the flower is illuminated with a conspicuous cluster of wine-red stamens. After the first crop of flowers, others will follow throughout the season. This is one of the most beautiful single roses. In many sections of the country, the canes will need no protection, but in northern states, lay them on the ground for the winter and cover with a little soil. \$1.50 ea.

CRIMSON CONQUEST. (Chaplin, 1933.) A very strong growing climber suitable for tall work, such as arches or pergola. The deep red flowers which are softened with cerise are borne on long stems good for house decoration. \$1.50 ea.

DOUBLOONS. LC. (M.H. Horvath, 1935.) Plant Patent applied for. A stunning new, perfectly hardy yellow climber developed from our native Prairie Rose, *Rosa setigera*, which gives it a hardiness greater than any other yellow climber. Very handsome. \$1.50 ea.

DUSTERLOHE. LC. (W. Kordes Sons, 1931.) A new hybrid of *R. arvensis*, with single red flowers 3 inches across and sweetly fragrant. A strong, hardy climber. \$1.00 ea.

10

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

Furthermore, it is crucial to review these records regularly to identify any discrepancies or errors. This proactive approach helps in maintaining the integrity of the financial data and prevents any potential issues from escalating.

In addition, the document highlights the need for clear communication between all parties involved. Regular updates and reports should be provided to ensure that everyone is on the same page and aware of the current status of the project or business.

Financial Summary and Outlook

The financial summary provides a detailed overview of the current state of the organization's finances. It includes a breakdown of revenues, expenses, and net income over the specified period. This information is essential for understanding the overall financial health and identifying areas for improvement.

Looking ahead, the outlook section discusses the projected financial performance for the next period. It takes into account various factors such as market trends, operational changes, and potential risks. This forward-looking analysis helps in making informed decisions and setting realistic goals for the future.

It is important to note that while the outlook is generally positive, there are certain risks that could impact the financial performance. These risks are being closely monitored, and contingency plans are in place to mitigate any potential negative effects.

Finally, the document concludes with a statement of confidence in the organization's ability to achieve its financial objectives. It expresses a commitment to transparency, accountability, and continuous improvement, ensuring that the organization remains on a path of sustainable growth and success.

EASLEA'S GOLDEN RAMBLER. LC. (W.Easlea & Sons,1952.) Plant Patent No. 114. A charming Climbing Rose with large, semi-double, golden yellow flowers borne in big sprays. The color fades to a delicious creamy yellow tint as the blooms age. Exceedingly handsome. The foliage is remarkably fine. \$1.50 ea.

GOLDEN CLIMBER. (Mrs! Arthus Curtiss James). LC. (Brownell,1933.) Plant Patent No. 28. Large, handsome clear sun-flower-yellow blooms borne on a vigorous, glossy-leaved climbing plant. For best results the canes should be trained horizontally to make them flower freely. Protect the plants somewhat in severe winters. \$1.50 ea.

GOLDEN DREAM (GOLDENER TRAUM). LC. (Robert Turke,1932.) A splendid new yellow Climbing Rose descended from the Rugosa race. The large, well-shaped flowers are of soft chamois-yellow with deeper golden shades on opening. Young plants in our nursery have bloomed repeatedly throughout the summer, promising a certain measure of remontance. We think it is a splendid new Climber. \$1.50 ea.

NEW DAWN. LC. (Somerset Rose Nurs.,1930.) Plant Patent No. 1. A very fine, practically everblooming Climber, a good deal like the well-known Dr. W. Van Fleet. \$1.50 ea.

REVEIL DIJONNAIS. LC. (E.M.Buatois,1931.) Large, semi-double or nearly single flowers of light yellow deeply edged with carmine, crimson, and scarlet. One of the most striking Climbing Roses. Best used as a moderately growing pillar. \$1.50 ea.

SKYROCKET. (Kordes,1934.) As a brilliant red pillar rose, this variety will have many uses in gardens as an accent in shrubbery borders or beds. It is everblooming, the flowers coming in large clusters. Plant habit is straight, upright. \$1.00 ea.

WINSOME. LC. (Dobbie & Co.,1951.) Large, double, cherry-red flowers with a fine Tea fragrance. A vigorous Climber and an abundant bloomer. \$1.25 ea.

NEW POLYANTHA ROSES

ANNE POULSEN. (D.T.Poulsen,1934.) Plant Patent applied for. A shrubby plant with very large, almost single, intensely fragrant flowers of brilliant scarlet, produced constantly throughout the season. Especially good for mass planting or low hedging. We recommend it highly. \$1.25 ea.

CHERIE. (H.Morse & Sons,1931.) A vivid scarlet-crimson sport of the well-known Polyantha, Else Poulsen. \$1.00 ea.

D. T. POULSEN. (D.T. Poulsen,1930.) Large, well-filled clusters of brilliant blood-red, single flowers. Strong plant and a continuous bloomer. \$1.00 ea.

IMPROVED LAFAYETTE. (Howard & Smith, 1935.) More vigorous growth and a better color are the improvements found in the new variety. The sturdy upright plants grow 2½ to 3 feet high. The blooms are glowing red suffused with vivid crimson. A splendid bedding rose and very free flowering. \$1.00 ea.

INGAR OLLSON. (Poulsen, 1931.) Semi-double; brilliant pink flowers. Large foliage. \$1.00 ea.

KAREN POULSEN. (D.T. Poulsen, 1933.) Very large, single, brilliant unfading scarlet flowers in clusters. Strong, upright growth. \$1.25 ea.

PERMANENT WAVE. Poly.Hyb. (M. Leenders, 1932.) Plant Patent No. 107. The name fits the case. The petals are fluted or waved, permanently from the bud stage to the finish. Blooms rather large for the type, in great clusters. Rosy pink with cerise edges. \$1.50 ea.

VALERIE. (Chaplin Bros, 1932.) Large trusses of clear yellow flowers. Upright, bushy growth. Leathery green foliage. \$1.50 ea.

* * * *

NEW HYBRID PERPETUAL

SYMPHONY (Pink Frau Karl Druschki.) (Weigand, 1934.) Plant Patent No. 79. The huge bloom developing from a large, pointed bud is pale rose with deep pink in the center, lighter at the edges. An exhibition rose, full and symmetrical carried on stout, straight stems. Intermittent bloomer all season. \$1.50 ea. *****

Prices are net. We will pay parcel post charges on small orders if cash accompanies them. If the shipments cannot be sent by parcel post, we will pack them securely in light wooden cases, without extra charge, and ship f. o. b. Rutherford, N. J. - transportation charges collect.
